Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims group I, embodiment 3, figure 6, claims 1 and 4-5 [note: applicant did not made any arguments] in the reply filed on 10/25/04 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art of figure 1 [AAPA] in view of Ettinger et al. [US 4,327,349].

AAPA discloses an inductive coupler for coupling a signal to a power line [800] comprising:

- a magnetic core [810], wherein the magnetic core contacts the power line; and
- a coil conductor [820] having insulation layer [825] wound around a portion of the magnetic core.

AAPA discloses the instant claimed invention except for the magnetic core having a semiconducting coating.

Ettinger et al. discloses a core structure for induction device having a semiconducting layer [16].

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to include semiconducting coating on the magnetic core of AAPA, as suggested by Ettinger et al., for the purpose of preventing breakdown and withstanding high voltage.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in view of Ettinger et al. as applied to claim 1 above, and further in view of Leijon [US 6,822,363].

AAPA in view of Ettinger et al. discloses the instant claimed invention except for a semiconducting layer over the insulation layer of the coil conductor.

Leijon discloses a conductor for a coil structure of a transformer/reactor having a semiconducting layer [5] disposed over an insulation layer [4].

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use conductor design of Leijon for the coil conductor of AAPA, as modified, for the purpose of improving corona discharge.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Stephanides [US 4,471,333] and Graul [US 3,959,761].
